PASTROVICH
POWERFUL
PASSION

A STEP FORWARD TOWARDS THE FUTURE, THE STEP THAT MARKED THE MEETING BETWEEN THE PASSION THAT HAS ANIMATED THE FIAT SHIPYARD FOR OVER THE LAST SIXTY YEARS AND THAT OF THE ECLECTIC GENOESE NAVAL ARCHITECT, STEFANO PASTROVICH, WHO DESIGNED THIS ICONIC 58-FOOTER.

Stefano Pastrovich

The perfect mix of functionality and style: innovative, muscular lines, at the same time light and slim.

At 35 knots, every moment is a race towards infinity.
Experience the luxury of speed that embraces your free spirit.

From bow to stern safely, via an easy central passage. Open and close the windshield as you wish, making the covered area fresh and airy on the hottest days, comfortable and sheltered in case of rain. You are at the center of the scene.

Relax in the large bow tub welcomed by soft cushions or have lunch with friends around the Japanese table: an environment tailor-made for your intimacy.

Dream big by celebrating romance and the pleasure of being together.
Where every moment is colored with warmth and lightness.

The sun dances on the large sundecks of the P58,
amidst the dreams and laughter of friends.
Every space is yours.

On board the P58, the descent into the water is a ritual, a moment of profound connection with the sea.

IT'S ALL IN THE DETAILS

From afar, every detail is revealed in a new light. Be inspired by this unique perspective and discover the infinite beauty that reveals itself far from the shore.

An elegant steel and oak staircase connects the outdoor spaces to a large living area amidships equipped with a kitchen and a large corner sofa with a petal-shaped coffee table, which can be transformed into an eight-seater dining table.

Ebony and dark oak, noble essences and refined fabrics enhanced by the breath of heights and the light that filters through the large windows that cross the entire hull, creating continuity between the internal and external environments.

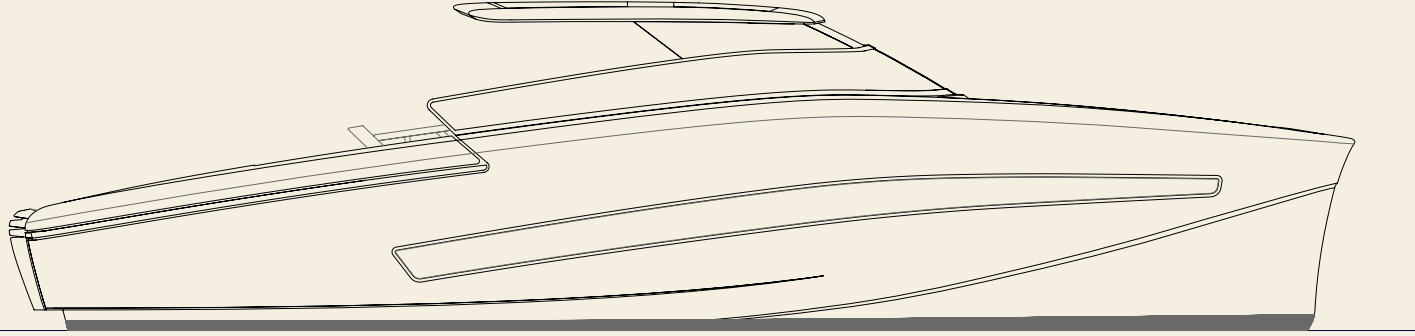

Interior spaces and furnishings conceived as sophisticated lofts, luxurious and refined.
You will feel at home.

LAYOUTS

OUTSIDE

The boat is equipped with a standard **rollbar** and a **hard top** that can be installed if and when you want.

You can decide whether to have an open boat, using the awnings to take advantage of the shade, or install the hard top, creating a central covered and sheltered space, a cool area to live in and furnish with a dining table and large sofas.

The **stern door**, when opened, allows access to a tender compartment located under the deck. The platform submerges, facilitating the descent of the tender into the water.

ROLLBAR

HARD TOP

INSIDE

The P58 blends with your desires. For this reason we have thought of 2 modular internal layouts that respond to every type of need:

- two large owner's cabins with two open space bathrooms with shower cubicles and separate toilet
- living room with kitchen amidships
- dayhead

or:

- aft master cabin with open space bathroom with shower cubicle and separate toilet
- two cabins in the bow, one for guests and one with two single beds, divided by a sliding wardrobe system which can be transformed, if necessary, into a single large, delightful and welcoming suite
- bathroom with shower cubicle and separate toilet
- living room with kitchen amidships
- day head

In all layouts, the aft cabin with double bed can be converted into 2 single beds. Both solutions include a cabin for the sailor.
